

UKRAINE CONTAINER CLINIC

We received these pictures from the ribbon cutting ceremony for our Ukraine Mobile Clinic conversion project. It is now on the way to its first destination.

The second and third containers are in process of being converted.

Thank you to all who supported this project. All the building materials, doors, windows, flooring etc were sent from Victoria. The electrical and respiratory materials were purchased in country.

All the medical equipment and supplies were also sent inside our containers.

What an amazing difference this container will make in the news few months.
